product description: DOBRMAN clamps are used to fasten cables or pipes to base material to create standardized or non-standardized cable trays with maintained functionality during fires.

The clamps are attached to base material using KPO 6 anchor, SVD screw or ZT 6 threaded rod and KPOZ 6 anchor. Max. fastening spacing is 600 mm for non-standardized trays. It's 300 mm for standardized cable trays.

On the clamps is thread M6 for fixing.

To facilitate installation the clamp is provided with a groove for insertion; it is not necessary to separate completely the top part of the clamp at the installation.

maximum load: max. 3 cables in one clamp

surface finish: ZNCR - galvanized steel

sales amount: á 1 pc

classification:

ČSN 73 0895	P 90-R
DIN 4102-12	E 90
STN 92 0205	PS 90

Fire classification is depend on the specific conditions of the cable tray, detailed in the catalog Systems with maintained functionality in fire.

.

storage: EN 60721-3-1
